Mains,Julie Cupples,Chris Lukinbeal,2015-10-12 This is the first comprehensive volume to explore and engage with current trends in Geographies of Media research. Grand Design Elizabeth A. H. Cleland,2014-10-06 Pieter Coecke van Aelst (1502 - 1550) was renowned throughout Renaissance Europe as a draftsman, painter, and publisher of architectural treatises. The magnificent tapestries he designed were acquired by the wealthiest clients of the day, up to and including rulers such as Emperor Charles V, King Francis I of France, King Henry VIII of England, and Grand Duke Cosimo I de' Medici of Tuscany. At the same time, Coecke was remarkable not only for the complexity and unparalleled quality of his tapestries, but also for his fluency in various media: this lavishly illustrated volume examines the full range of his work, from tapestry and stained-glass window designs to panel paintings, prints, drawings, and architectural treatises. Though only forty-eight when he died, Coecke was one of the greatest Netherlandish artists of the sixteenth century. His paintings and drawings, initially wrought in the style of the Antwerp Mannerists, evolved through his enthusiastic response to Italian Renaissance design, and influenced generations of artists in his wake. This comprehensive study explores Coecke's stylistic development, as well as his substantial contribution to the body of great Renaissance art in Flanders. Featuring twenty monumental tapestries, along with many of their cartoons and preparatory sketches, plus seven paintings, additional drawings, and printed matter—many of them newly photographed for this volume—Grand Design provides a thorough reappraisal of Coecke's work, amply justifying the high regard in which Coecke's work was held and its wide dissemination long after his death.

Screening Nature Anat Pick,Guinevere Narraway,2013-11-01 Environmentalism and ecology are areas of rapid growth in academia and society at large. Screening Nature is the first comprehensive work that groups together the wide range of concerns in the field of cinema and the environment, and what could be termed "posthuman cinema." It comprises key readings that highlight the centrality of nature and nonhuman animals to the cinematic medium, and to the language and institution of film. The book offers a fresh and timely intervention into contemporary film theory through a focus on the

nonhuman environment as principal register in many filmic texts. Screening Nature offers an extensive resource for teachers, undergraduate students, and more advanced scholars on the intersections between the natural world and the worlds of film. It emphasizes the cross-cultural and geographically diverse relevance of the topic of cinema ecology.

Louise Nevelson Robert Indiana, Anthony Haden-Guest, 2012 Louise Nevelson (1899-1988) is one of the most important sculptors of the last century, famous for her large-scale, monochromatic wood assemblages and outdoor works. Nevelson was born in Czarist Russia--immigrating to the US with her family at the age of three--and had her first solo exhibition at the prestigious Nierendorf Gallery in 1941. This extensively illustrated publication--with 157 images in color--is the first to focus on her collage work. Made throughout her career and every bit as important as her parallel work of the time, Nevelson's collages have been out of the public eye for three decades. With never-before-published documentary images alongside personal essays by Robert Indiana and Bill Katz, this long overdue publication repositions these treasures of art history--as well as the reputation of their creator--for today's audience.
