**Waldemar Karwowski, Tareq Ahram, Mario Milicevic, Darko Etinger and Krunoslav Zubrinic**

**Participatory Sensing, Opinions and Collective Awareness** Vittorio Loreto, Muki Haklay, Andreas Hotho, Vito D.P. Servedio, Gerd Stumme, Jan Theunis, Francesca Tria, 2016-05-13 This book introduces and reviews recent advances in the field in a comprehensive and non-technical way by focusing on the potential of emerging citizen-science and social-computation frameworks, coupled with the latest theoretical and modeling tools developed by physicists, mathematicians, computer and social scientists to analyse, interpret and visualize complex data sets. There is overwhelming evidence that the current organisation of our economies and societies is seriously damaging biological ecosystems and human living conditions in the short term, with potentially catastrophic effects in the long term. The need to re-organise the daily activities with the greatest impact – energy consumption, transport, housing – towards a more efficient and sustainable development model has recently been raised in the public debate on several global, environmental issues. Above all, this requires the mismatch between global, societal and individual needs to be addressed. Recent advances in Information and Communication Technologies (ICT) can trigger important transitions at the individual and collective level to achieve this aim. Based on the findings of the collaborative research network EveryAware the following developments among the emerging ICT technologies are discussed in depth in this volume: • Participatory sensing – where ICT development is pushed to the level where it can support informed action at the hyperlocal scale, providing capabilities for environmental monitoring, data aggregation and mining, as well as information presentation and sharing. • Web gaming, social computing and internet-mediated collaboration – where the Web will continue to acquire the status of an infrastructure for social computing, allowing users' cognitive abilities to be coordinated in online communities, and steering the collective action towards predefined goals. • Collective awareness and decision-making – where the access to both personal and community data, collected by users, processed with suitable analysis tools, and re-presented in an appropriate format by usable communication interfaces leads to a bottom-up development of collective social strategies.

Color Trends and Selection for Product Design Doreen Becker, 2016-05-13 Color Trends and Selection for Product Design: Every Color Sells a Story speaks to the needs of the manufacturing level where colorants are developed, helping manufacturers to understand where their colors will sell and for what period of time these products will be viable. It covers issues such as stability, color measurement, and new methods of incorporation, which are critical in the development of new

colorants. The book helps product designers more effectively reach their target audiences by helping them understand more about how colors are chosen for particular markets and how certain colors will perform in designs, including how to evaluate color under different lighting conditions and in, or on, different materials. Knowing how colors will perform in each material and how they will be seen on a store shelf or show room floor is vital. The book gives an important insight into future trends, including new design methods for creating color prototypes and regulatory requirements. The color designer needs to better understand the world of the color formulator, and the formulator conversely needs to understand the needs of the designer, so this book is written for both. Provides an expert assessment of future trends in color, helping color manufacturers to understand how their customers and brand owners select colors Covers the critical issues of stability, color measurement, and new methods of incorporation, helping engineers evaluate color performance in different designs, materials, and lighting conditions Helps readers stay ahead of the competition with discussions of important regulations and trends in 'green' colors and product design

Human Systems Engineering and Design (IHSED 2021): Future Trends and Applications Waldemar Karwowski, Tareq Ahram, Mario Milicevic, Darko Etinger and Krunoslav Zubrinic, 2021-09-25 Proceedings of the 4th International Conference on Human Systems Engineering and Design (IHSED2021): Future Trends and Applications, September 23-25, 2021, University of Dubrovnik, Croatia

Modern Trends in Cartography Jan Brus, Alena Vondrakova, Vit Vozenilek, 2014-12-02 The fast exchange of information and knowledge are the essential conditions for successful and effective research and practical applications in cartography. For successful research development, it is necessary to follow trends not only in this domain, but also try to adapt new trends and technologies from other areas. Trends in cartography are also quite often topics of many conferences which have the main aim to link research, education and application experts in cartography and GIS&T into one large platform. Such the right place for exchange and sharing of knowledge and skills was also the CARTOCON2014 conference, which took place in Olomouc, Czech Republic, in February 2014 and this book is a compilation of the best and most interesting contributions. The book content consists of four parts. The first part New approaches in map and atlas making collects studies about innovative ways in map production and atlases compilation. Following part of the book Progress in web cartography brings examples and tools for web map presentation. The third part Advanced methods in map use includes achievement of eye-tracking research and users' issues. The final part Cartography in practice and research is a clear evidence that cartography and maps played the significant role in many geosciences and in many branches of the society. Each individual paper is original and has its place in cartography.

**HCI and Design in the Context of Dementia** Rens Brankaert, Gail Kenning, 2020-07-16 Old age is currently the greatest risk factor for developing dementia. Since older people make up a larger portion of the population than ever before, the resulting increase in the incidence of dementia presents a major challenge for society. Dementia is complex and multifaceted and impacts not only the person with the diagnosis but also those caring for them and society as a whole. Human-Computer Interaction (HCI) design and development are pivotal in enabling people with dementia to live well and be supported in the communities around them. HCI is increasingly addressing the need for inclusivity and accessibility in the design and development of new technologies, interfaces, systems, services, and tools. Using interdisciplinary approaches HCI engages with the complexities and 'messiness' of real-world design spaces to provide novel perspectives and new ways of addressing the challenge of dementia and multi-stakeholder needs. HCI and Design in the Context of Dementia brings together the work of international experts, designers and researchers working across disciplines. It provides methodologies, methods and frameworks, approaches to participatory engagement and case studies showing how technology can impact the lives of people living with dementia and those around them. It includes examples of how to conduct dementia research and design in-context in the field of HCI, ethically and effectively and how these issues transcend the design space of dementia to inform HCI design and technology development more broadly. The book is valuable for and aimed at designers, researchers, scholars and caregivers that work with vulnerable groups like people with dementia, and those directly impacted.

Colorful Crochet Cables Noelle R. B. Stiles, 2024-07-16 Don't be afraid to mix colors and cables! The often-repeated advice that it is best to choose solid-color yarns when you crochet cables is not always true. With a little bit of knowledge and planning, you can crochet beautiful Celtic cables and enhance the design with your choice of a multicolored yarn. Author Noelle R. B. Stiles is a vision scientist and has done extensive research into the art and science of color play (so that you don't have to!). What she brings to this book is the practical side of color usage. She gives you a broad look at how colors and designs work together and illustrates how color choices affect the final outcome of your crochet pieces. She specifically sets out to prove that multicolored yarns should not be sidelined in your textured crochet pieces and can be used to great advantage. With practical examples and 20 patterns, she shows how crochet designs can feature both a multicolored yarn and an intricate cable to gorgeous effect. Patterns include eye-catching scarves, hats, mitts, blanket, cardigan, and more. If you are new to cabling, there are step-by-step instructions and several beginner patterns. Pull out your favorite hand-painted or variegated yarn and give it a try!
